

Your **FREE
Guide to
Natural Health**

Introduction

Welcome to Go Life Healthcare!

Here you will find many resources to feel your absolute best in life! Go Life endeavours to set the trend in the global nutraceutical and cosmeceutical markets, with its focus on product quality, safety and customer care satisfaction.

In our e-book you will be able to learn about our range of products and how they can guide you in living a healthier life and to assist you with individual ailments.

Our vision at Go Life is to enable our current and / or futuristic clients from all walks of life, independent of gender, age, social status and nationality, a healthier life.

Go Life adds value to the market by combining its extensive knowledge with exceptional product innovation, providing solutions to the unmet medical needs of a growing world population.

The success stories are founded on patented technologies, products, ingredients and proprietary formulas. These have been researched and developed over many years by dedicated teams of renowned scientists and practitioners in the medical and pharmaceutical industries of South Africa and Germany.

Go Life's product range is based on a combination of selected vitamins, co-factors and minerals, as well as specific natural ingredients. A unique feature of the Go Life technology is the ability to dramatically increase the bioavailability through formulation of fat-soluble compounds (e.g. Vitamin D, E, CoQ10, essential fatty acids and natural extracts) into water soluble forms.

Go Life consists of internationally experienced, highly committed scientific and business experts, combining more than 240 years in the life sciences industry including research, product development and manufacturing.

Production methods are validated and continuously audited by regulatory authorities and comply with the highest standards (such as Current Good Manufacturing Practices - cGMP). Go Life's products are also registered with the Medicines Control Council of South Africa (MCC).

To answer the question of why us in short; nobody else can!
